WE'RE CHARGING **THE FUTURE**

As the Battery Charging Partner of choice for
Top Global OEMs transitioning to all-electric
vehicles and industrial machines.

About Delta-Q Technologies

Delta-Q Technologies is charging the future and driving the industrial and recreational vehicle electrification transition. We design, test, and manufacture robust battery chargers that improve the performance of our customer's electric drive vehicles and industrial machines. As the supplier of choice for Tier 1 OEMs, we use collaboration, perseverance, and engineering expertise to guide our customers through the electrification process leading to a sustainable world.

Delta-Q and Zivan represent the ZAPI GROUP's battery charging expertise, collaborating closely with other component companies in its electric drive-train system portfolio. Our technical team and distribution capabilities span five continents and service markets such as material handling, aerial work platforms, e-mobility, floor care, utility/recreational vehicles (electric golf carts), outdoor power equipment, agriculture and construction.

Delta-Q's Charging Solutions

We offer charging solutions for lead-acid and lithium batteries and partner with leading battery and BMS manufacturers to develop, test and validate custom charging algorithms for enhanced performance and safer charging. Our products are tested for harsh applications to avoid charging failure, and our charging software is robustly developed to recognize potential charging hazards.

XV SERIES

The XV Series is the best-in-class, 3-in-1 charging system. It is compact, scalable and reliable – an ideal charging solution for powertrain electrification!

LEAD ACID & LITHIUM

3.3 kW - 10 kW

48 V - 80 V - 96 V

APPLICATIONS

RC SERIES

The RC Series are compact, IP66 sealed, lightweight, flexible, reliable charging solution for all lead-acid and lithium batteries.

LEAD ACID & LITHIUM

900 W - 1.2 kW

24 V - 36 V - 48 V

APPLICATIONS

ICL SERIES

The ICL Series are reliable, compact, rugged, automotive grade chargers that are enhanced to charge 9S to 34S lithium battery packs optimizing battery life and application performance.

LITHIUM ONLY

900 W - 7.5 kW

57 V - 85 V - 120 V

APPLICATIONS

RQ SERIES

The RQ Series is a compact, ruggedized and fully-sealed charging series that is setting a higher quality standard and customer experience in the low-power battery charger market.

LEAD ACID & LITHIUM

12 V - 24 V - 36 V - 48 V

350 W & 700 W

APPLICATIONS

IC SERIES

The IC Series are compact, flexible, user-friendly industrial chargers that optimally charge lead-acid (wet, AGM, gel) and lithium battery packs to provide the best performance for the intended application.

LEAD ACID & LITHIUM

24 V - 36 V - 48 V

650 W - 1200 W

APPLICATIONS
