Electric Vehicle Experts

Howland Technology is a leading systems integrator for electric/hybrid drive solutions, supporting OEMs with engineering, system components, and software integration. Headquartered in Illinois, we serve North America with custom design services, top-tier components, and expert support to help clients—from startups to global manufacturers—build efficient, zero-emission vehicles and equipment.

About Us

30+ Years of Expertise in EV System Integration

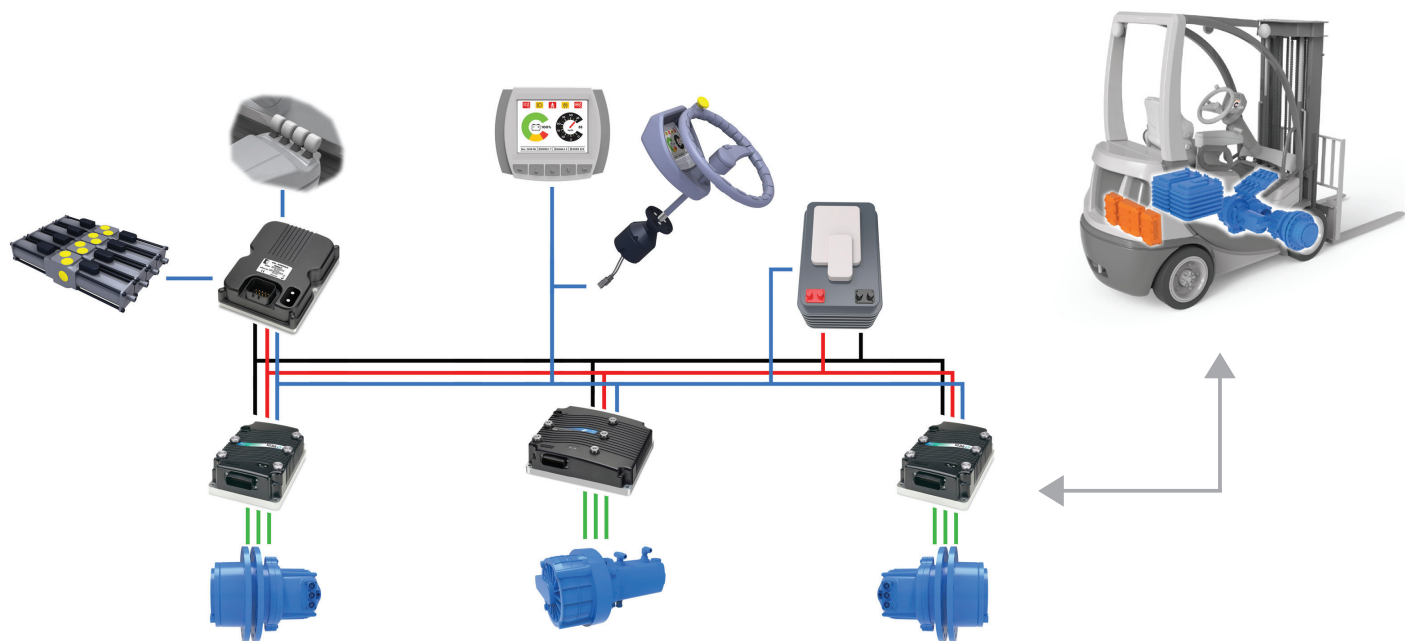

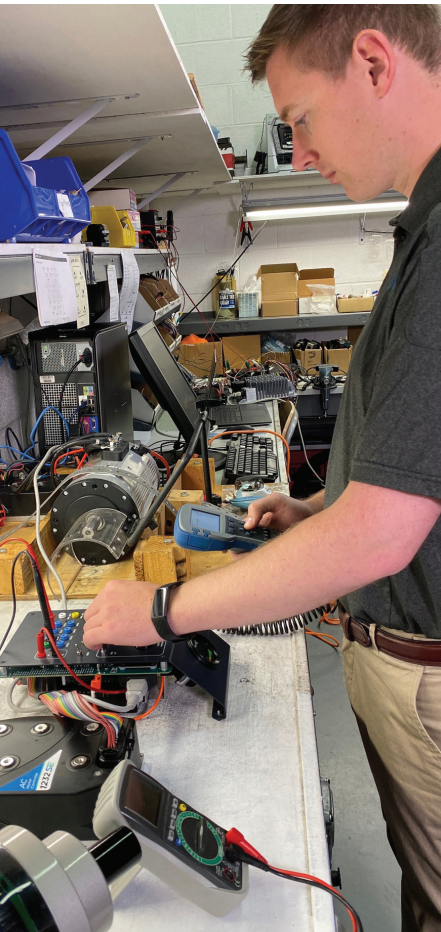

Founded in downtown Chicago, Howland Technology has become a premier technology and systems integration expert for battery- powered drive solutions. Headquartered in Morton Grove, IL, our state-of-the-art facility houses offices, distribution, and a technical center under one roof, serving OEMs nationwide. We specialize in supporting the design and build of custom electric drives for zero-emission vehicles, offering services like system integration, performance optimization, and software programming.

Your EV Engineering Partners

Howland Technology’s extensive engineering expertise spans all types of battery-electric vehicles for virtually any application using power systems ranging from 24V up to 800V. We will help assure that your EV is the best it can be. Howland Technology provides components or partners with you to undertake the hardware and software integration of the battery electric drive system. We partner with OEM vehicle manufacturers to develop fully optimized custom EV integrated systems to their exact specifications. We provide a unique combination of business experience and technological expertise to ensure customer success in an ever-changing and emerging EV transportation world. Our OEM customers see Howland Technology as a partner they can trust to help them apply technology for their competitive advantage. We are committed to a coordinated and integrated process to design-in quality from product concept to product delivery. We assure that any products we offer are engineered to meet the highest industrial quality, reliability and safety standards.

Our Commitment to You

Our focus on long-term partnerships ensures mutual success with our customers and suppliers.

Our dedication to community and charitable giving underscores our role as a responsible corporate citizen. We believe in honesty, integrity, and unwavering commitment to excellence in everything we do.

Ease of Doing Business

Positive Customer Experience

Honesty and Integrity

EV System Solutions

The Right Systems and Components for any EV Application

As a premier system integrator, stocking distributor and direct factory sales agent for some of the world’s leading manufacturers, we stock the right system components for virtually every electric system solution. Howland Technology will help you specify a complete system or provide the individual components you need to design and build your electric vehicle or equipment. Our primary product baskets includes the full spectrum and virtually all other components and accessories needed to build a complete EV system. We stock hundreds of different models.

For an easy overview, all products are listed with complete technical specifications on our website: www.howlandtechnology.com

Key Products

- Vehicle Instrumentation and Display
- Onboard and Offboard Chargers
- Emergency Disconnect Switches
- IC, XV and ICL Series Chargers
- Modular Energy Storage Units
- Battery Management Systems
- Ergonomic System Interfaces
- CAN-enabled Smart Chargers
- AGV Sensors and Encoders
- Motor Reversing Contactors
- Operator Control Panels
- Joysticks and Handles
- Electric Drive Systems
- Lithium Battery Packs
- Planetary Gear Drives
- DC/DC Converters
- Motor Controllers
- Electric Motors
- DC Contactors
- Motor Pumps

Our Trusted Partners

A Legacy of Powering Possibilities. We are committed to helping OEMs achieve success through cutting-edge solutions.
